

# How to fill title and meta-description for a product?

In the Boundless Commerce system, by default, the Title and Meta-description of a product are automatically generated based on a template.

You can use the current template, or if there are few products in the catalog, make changes to the Title and Meta-description from the product card.

To do this, in the product card on the “Basic” tab, click on the “Edit” button next to “Preview in search results”.

**Battery Case Odoyo Power+Shell for iPhone 6/6S**

The data that is specified in the Title and Meta-description fields in the product card takes precedence over the template, so if the data is entered, it will be shown in the search results.
